

CredX receivers are specially designed holders of NFC-enabled mobile phones.

The unique design enables you to use your system anywhere, even outside, as the receiver cases include space for batteries which can last for at least 7 days.

Designed and manufactured by Intelligent Health Ltd the receivers are versatile:

- They can be attached to walls, posts or left free standing
- They are weather-proof and secure with an integral but discrete locking mechanism
- They outside window can be removed to insert text, pictures or to display branding or advertising
- The design has an 'x' displayed on the receivers – RFID cards are swiped above the 'x' and the phone flashes orange several times to show a successful transmission

CredX receivers can be purchased individually or in bulk – batteries and other accessories can be ordered separately (see next page). Receivers can be attached to mains electricity if necessary.

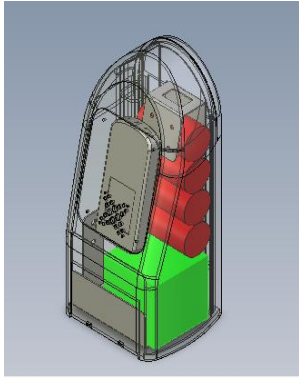

Each receiver 'unit' is provided with an instruction manual.

COST INFORMATION

Quantity of boxes	Price per box*
1-19	£258.00
20-49	£234.55
50-99	£206.40
100-499	£172.00
500 +	£103.20
*Prices exclude VAT and delivery charges	

Accessories

To ensure you can make the most of the versatility of your CredX receivers you will need to purchase batteries and the correct accessories to attach your receiver.

- batteries
- battery chargers
- attachment accessories

Batteries and battery chargers

- The 9.6V 10Ah NiMH batteries are some of the most powerful and advanced batteries available.
- These batteries can be recharged up to 1000 times or last over 9 years if recharged just once a week. After one week in the receiver it will take between 6-12 hours to charge.
- The battery packs are provided in a specially designed pack. They fit as highlighted in the image above (batteries in red).
- Battery chargers will be provided as requested. There is a standard charge of £11/per charger.

PLEASE NOTE: If the batteries need to be replaced or discarded then please send them back to Intelligent Health and we will dispose of them for you.

Tamtorque fixing bands

- If you are attaching the receiver to a post you will need two Tamtorque bands per receiver at 70mm-100mm size. You will also be provided with the necessary tools.
